

Prajval Akka

Python Full Stack Developer

prajval280412@gmail.com · github.com/Prajval-Akka · linkedin.com/in/prajval-akka-0322m · Bengaluru, India

EDUCATION

B.Tech, Mathematics and Computing - M. S. Ramaiah University of Applied Sciences (RUAS), Bangalore · 2024-2028

EXPERIENCE

AI Intern - CodeAlpha · Aug 2026 · 1 mo · Remote

Built artificial intelligence projects end to end - framing the problem, implementing the model, and checking the result. Worked with agentic AI development patterns alongside core AI concepts.

AI/ML Intern - QSkill · Jul 2026 · 1 mo · Remote

Machine learning internship covering data preprocessing, model development, and data analysis in Python. Hands-on with neural network architecture, training, and evaluation.

Data Science & ML Intern - upSkill Campus · Nov 2025 - Dec 2025 · 2 mos · Remote

Two-month program across data science and machine learning fundamentals: data analysis, feature preparation, and building models in Python.

AI/ML Intern - InternPe · Oct 2025 · 1 mo · Remote

Applied artificial intelligence and machine learning techniques to practical, self-contained tasks across the Python data and modelling stack.

PROJECTS

SatQueryAI - Full stack geospatial question-answering engine. An agent decomposes natural-language questions into tool calls, executes them server-side, and streams overlays back to a React 19 + Vite workbench. FastAPI and Uvicorn backend, MySQL storing ULID-keyed run logs, raster bytes in object storage.

Machine learning - CIFAR-10 image classifier (97% accuracy; ANN baseline 40% improved via CNN and ResNet50 transfer learning), MNIST digit classifier, IPL match outcome predictor (79%), diabetes classifier (78%), breast cancer predictor, crop production predictor, mining process predictor, car price regression, spam detector, flower species classifier, live image detector.

Web - Harry Potter Q&A bot (React), hand-coded portfolio site in HTML, CSS, and JavaScript. Sixteen public repositories at github.com/Prajval-Akka.

SKILLS

Python · FastAPI · JavaScript · React · Vite · Tailwind CSS · MySQL · Docker · Git · Scikit-learn · Pandas · NumPy · TensorFlow · Keras · Jupyter · HTML/CSS

CERTIFICATIONS

Microsoft - Basic Cybersecurity threats attacks and mitigation (Nov 2025)

Infosys Springboard - Cloud Native Development using Kubernetes (Nov 2025), Advanced SQL (Aug 2025), Python Programming (Jul 2025)

Kaggle - Python (Nov 2025), Pandas using Python (Sep 2025)

HackerRank - Python (Oct 2025), SQL Basic (Sep 2025)

Skillsoft - NumPy for Multi-dimensional Data using Python (Oct 2025)

LinkedIn - Artificial Intelligence and Machine Learning (Aug 2025)
